Roll up for WA
COVID-19 Vaccination

COVID-19 is in the community.

COVID-19 vaccination is free, safe and available for children aged 5 to 11. It's the best way to protect children from COVID-19.

Did you know?

- **Vaccination offers all children strong protection against severe illness, hospitalisation and chronic symptoms.**
- **Most children who test positive to COVID-19 will experience mild symptoms, however there's strong evidence to support vaccinating children.**
- **Children with pre-existing medical conditions are at greater risk from COVID-19.**
- **Vaccines give the immune system a helping hand to protect against serious illness and possible long-term effects from COVID-19.**
- **Reducing transmission in schools means education settings will be safer and children can spend time face-to-face learning, playing, participating in sporting activities and spending time with friends.**
- **Vaccination reduces the risk of children transmitting COVID-19 to other children and family members.**
